

### **Listing of the Claims**

The following listing of claims will replace all prior versions and listings of the claims in the application:

1. (Currently Amended)      A method of navigating a mobile device display comprising:
  - highlighting a first icon of a plurality of icons displayed in a main portion of the mobile device display;
  - traversing the main portion to a tertiary tab, wherein traversing the main portion to the tertiary tab includes opening the tertiary tray by highlighting the tertiary tab, wherein opening the tertiary tray includes displaying the tertiary tray in the mobile device display and wherein opening the tertiary tray includes rearranging only a portion of the main portion of the mobile device display such that ~~the first icon is~~ all of the plurality of icons remain visible in the main portion of the mobile device display, the tertiary tray including at least one scroll button and a second icon; and
  - highlighting the second icon, wherein a single navigation key is used to traverse the main portion and to highlight the second icon, wherein the tertiary tray is adjacent to a horizontal edge of the mobile device display.
2. (Canceled)
3. (Original)    The method of claim 1, further comprising selecting the scroll button such that a third icon is displayed in the tertiary tray.
4. (Original)    The method of claim 3, wherein selecting the scroll button includes shifting the second icon.
5. (Original)    The method of claim 4, wherein shifting the second icon includes not displaying the second icon in the tertiary tray.
6. (Canceled)

7. (Previously Presented) The method of claim 1, wherein opening the tertiary tray includes covering at least part of the main portion of the mobile device display.

8. (Original) The method of claim 7, wherein covering at least part of the main portion of the mobile device display includes covering at least part of the first icon.

9. (Canceled)

10. (Previously Presented) The method of claim 1, wherein opening the tertiary tray includes scaling at least part of the main portion of the mobile device display.

11. (Previously Presented) The method of claim 1, wherein opening the tertiary tray includes shifting at least part of the main portion of the mobile device display.

12. (Original) The method of claim 1, further comprising selecting the second icon.

13. (Original) The method of claim 12, wherein selecting the second icon initiates an application corresponding to the second icon.

14. (Original) The method of claim 12, wherein selecting the second icon closes the tertiary tray.

15. (Original) The method of claim 12, wherein selecting the second icon causes the second icon to be displayed in the main portion of the mobile device display.

16. (Original) The method of claim 15, wherein displaying the second icon in the main portion of the mobile device display includes removing the first icon from the main portion of the mobile device display.

17. (Original) The method of claim 15, wherein displaying the second icon in the main portion of the mobile device display includes moving the first icon in the main portion of the mobile device display.

18. (Currently Amended) A mobile device display comprising:

a main portion including a first icon of a plurality of icons displayed in the main portion, the first icon representing at least one of a service and an application;  
and

a tertiary tab, wherein the tertiary tab is a link to a tertiary tray capable of opening the tertiary tray, wherein opening the tertiary tray includes displaying the tertiary tray in the mobile device display and wherein opening the tertiary tray includes rearranging only a portion of the main portion of the mobile device display such that ~~the first icon is~~ all of the plurality of icons remain visible in the main portion of the mobile device display, the tertiary tray including a second icon and at least one scroll button wherein a single navigation key is used to traverse the main portion to the second icon in the tertiary tray, wherein the tertiary tray is adjacent to a horizontal edge of the mobile device display.

19. (Original) The mobile device display of claim 18, wherein the main portion includes a first set of icons including the first icon and the tertiary tray includes a second set of icons and wherein the first set of icons is a subset of the second set of icons.

20. (Canceled)

21. (Original) The mobile device display of claim 20, wherein the tertiary tray is not displayed until the tertiary tab is highlighted.

22. (Original) The mobile device display of claim 18, wherein the mobile device display is included in a mobile device.

23. (Currently Amended) A method of navigating a mobile device display comprising:

highlighting a first icon of a plurality of icons displayed in a main portion of the mobile device display;

traversing the main portion to a tertiary tab, wherein traversing the main portion to the tertiary tab includes opening the tertiary tray by highlighting the tertiary tab, wherein opening the tertiary tray includes displaying the tertiary tray in the mobile device display and wherein opening the tertiary tray includes rearranging only a

portion of the main portion of the mobile device display such that ~~the first icon is~~ all of the plurality of icons remain visible in the main portion of the mobile device display, the tertiary tray including a second icon and at least one scroll button;

highlighting the second icon, wherein a single navigation key is used to traverse the main portion and to highlight the second icon, wherein the tertiary tray is adjacent to a horizontal edge of the mobile device display;

traversing the tertiary tray to highlight the scroll button;

selecting the scroll button such that a third icon is displayed in the tertiary tray;

and

selecting the third icon, wherein selecting the third icon initiates a corresponding application.
